

**WOOD.  
THE ONLY BUILDING  
MATERIAL THAT REALLY  
DOES GROW ON TREES.**

©2002 Wood Promotion Network Be Constructive™

**NORTH AMERICA'S TREES ARE ABUNDANT AND OUR FORESTS ARE GROWING.** Thanks in large measure to steady regeneration, North American forests have grown 20 percent since 1970 and are about the same size as they were 100 years ago. And, sustainable forests producing abundant supplies of affordable, renewable wood help to insure that your business continues to thrive well into the future. To find out more about what makes wood the world's favorite and most environmentally sound building material, visit our websites at [www.beconstructive.com](http://www.beconstructive.com) and [www.forestinformation.com](http://www.forestinformation.com).

**WHO ARE WE?** We're the Wood Promotion Network: Supporting professionals across North America who build with wood, nature's reliable and renewable construction material. We also promote the responsible management of our growing and abundant forests, so the materials you construct with today will let you be constructive for years to come. To learn more about the Wood Promotion Network call (866) ASK-WOOD or visit our websites: [www.beconstructive.com](http://www.beconstructive.com) and [www.forestinformation.com](http://www.forestinformation.com).
